A brand can become the official partner of a defined category or create a named experience within the event.

GOODHEARTAPP
NYC

Founding Partners have the opportunity to:

- shape their role with the creative team
- establish a meaningful category position
- develop a custom activation
- participate in original content
- integrate products naturally into the experience
- connect with creators and guests
- participate in GoodHeart commerce
- extend the relationship beyond the event

The objective is simple:

Build something people remember—not something people have to be sold.

Founding partners enter before the experience is crowded with commercial relationships.

WHY FOUNDING STATUS MATTERS

THE STANDARD

EVERY PARTNERSHIP MUST PASS ONE TEST:

Does this make the experience better for the person watching or attending?

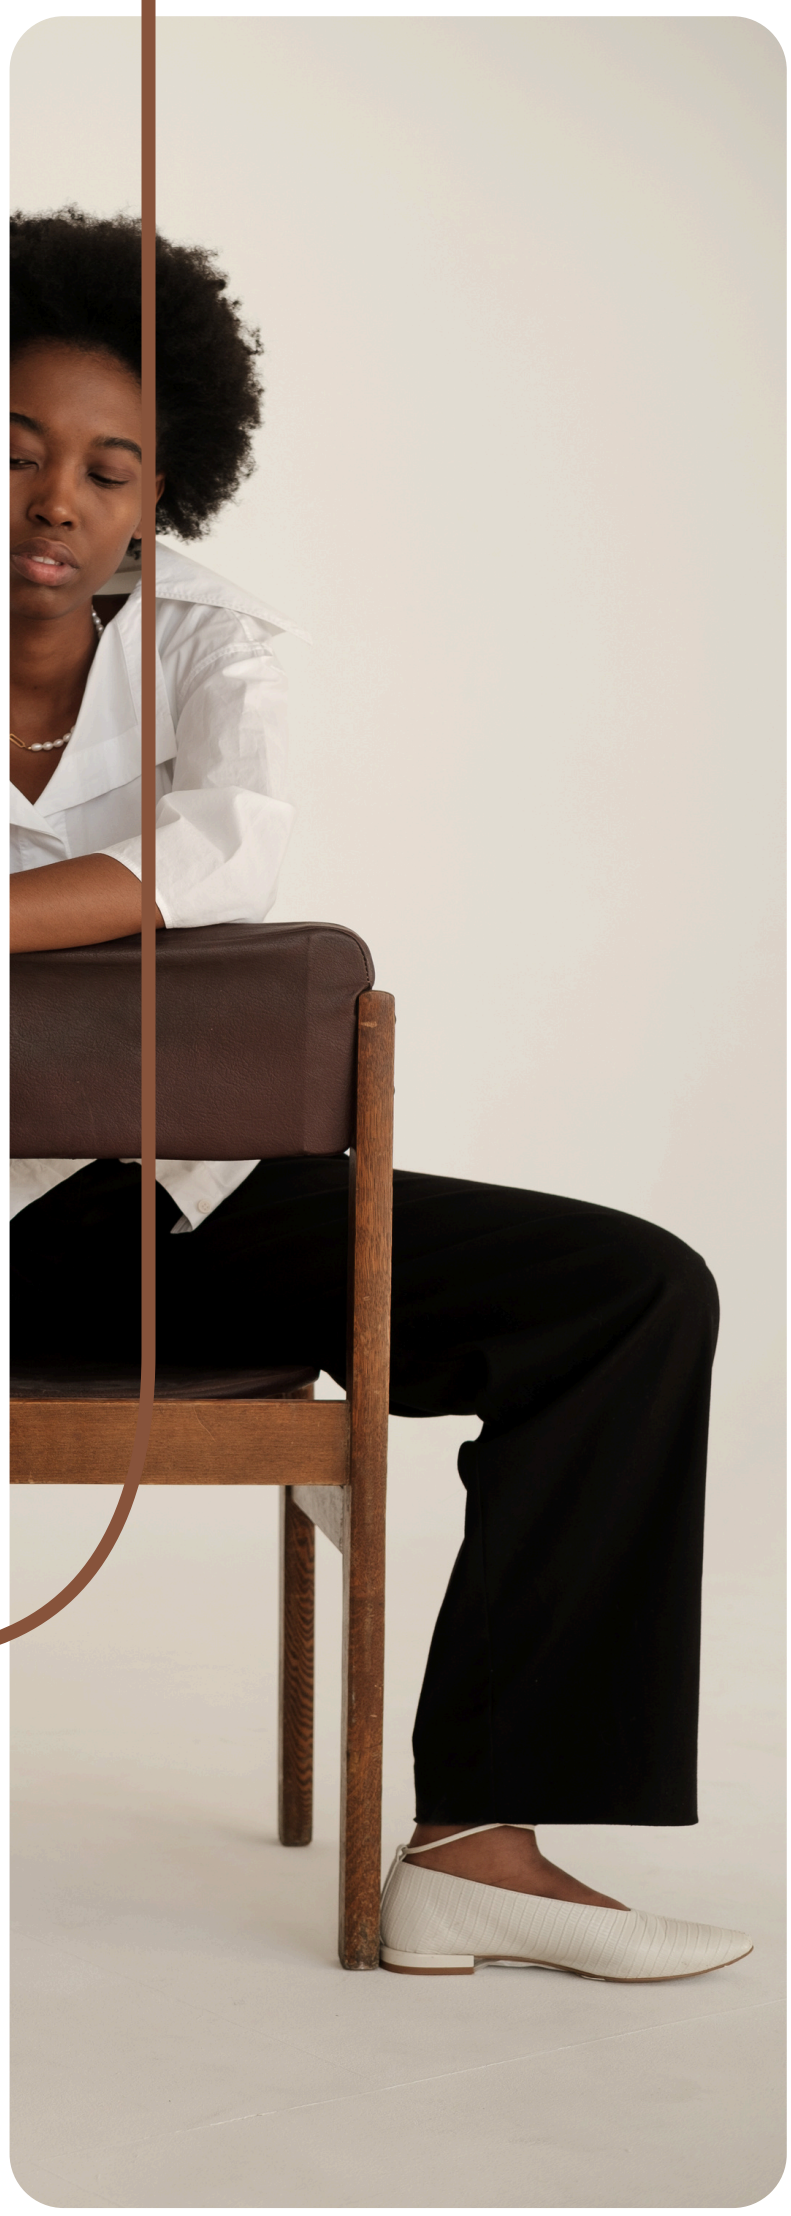

If the answer is no, we don't need the activation.

If the answer is yes, we can build something together.
